DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10-25-04 has been entered.

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsuura (5,615,318).

Regarding Claims 1, 5, and 9, Matsuura teaches a coordinate input apparatus and a control method and a computer-readable memory which detects three-dimensional position coordinates of an indicating tool (fig.23; col.14, lines 16-25) used in combination with a display (40 in fig.3) for displaying a window based on two-dimensional coordinates (Summary; Figures 1-3, 31-33; col.6, lines 7-45) , comprising: storage means for storing a set of coordinate values of a plurality of points for defining a three-dimensional space area (fig.3; col.2, lines 25- col.3, line 20; col.4, lines 10-28; col.8, lines 1-13);

determination means for determining whether a three-dimensional coordinate value as position coordinates of the indicating tool belongs to the three-dimensional space area defined by the set of coordinate values stored in the storage means (figs.1-3; col.2, line 65- col.4, line 27; col.6, line 7- col.7, line 6; col.13, line 30- col.14, line 40 ; col.23, lines 10-31; col.24, lines 60-65); and

conversion means for converting, responsive to a determination of the determination means that the three-dimensional coordinate value belongs to the three-dimensional space area, a position of the three-dimensional coordinate value in the three-dimensional space area into a display coordinate value of the display (summary; figs.22-24; col.4, lines 1-28; col.13, line 30- col.14, line 40 for 3 D mapping; col.23, lines 10-31; col.24, lines 61- col.25, line 9) .

Regarding Claims 2, 6, Matsuura teaches the storage means stores a set of coordinate values of a plurality of points for defining each coordinate area for each of a plurality of types of coordinate input areas (fig.3; col.2, lines 25- col.3, line 20; col.4, lines 10-28; col.8, lines 1-13; col.13, line 30- col.14, line 40).

Regarding Claims 3, 7, Matsuura teaches the storage means further stores switch information indicating coordinate input operation of the indicating tool for each of the coordinate input areas (fig.3; col.2, lines 25- col.3, line 20; col.4, lines 10-28; col.8, lines 1-13; col.13, line 30- col.14, line 40).

Regarding Claims 4, 8, Matsuura teaches the storage means further stores a definition table for defining operation of executing predetermined processing corresponding to operation of a mouse (fig.23; col.14, lines 15-28) with respect to a plurality of switches of the coordinate input area and the indicating tool (fig.3; col.2, lines 25- col.3, line 20; col.4, lines 10-28; col.8, lines 1-13; col.13, line 30- col.14, line 40).

Response to Arguments

4. Applicant's arguments filed on 10-25-2004 have been fully considered but they are not persuasive.

Applicant argues that Matsuura does not teach an indicating tool.

However, Matsuura does teach an indicating tool (fig.23; col.14, lines 16-25).

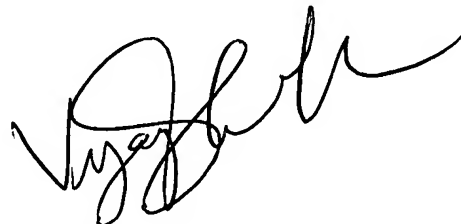

Applicant argues that Matsuura does not teach the determination means for determining whether a three-dimensional coordinate value as position coordinates of the indicating tool belongs to the three-dimensional space area defined by the set of coordinate values stored in the storage means.

However, Matsuura teaches the determination means for determining whether a three-dimensional coordinate value as position coordinates of the indicating tool belongs to the three-dimensional space area defined by the set of coordinate values stored in the storage means (figs.1-3; col.2, line 65- col.4, line 27; col.6, line 7- col.7, line 6; col.13, line 30- col.14, line 40 ; col.23, lines 10-31; col.24, line 61-65).
